# Service Agreement

## POINT CHECKLIST

1. **Check** and identify leaks that could be costing you hundreds of dollars per year in wasted water.
2. **Repair faucet leaks** by tightening loose handles, packing nuts, or valve stems (repairs requiring parts cost extra). Eliminating a 1/32" diameter leak reduces your water bill by more than the annual investment in the Amazing Plumbing Protection Plan.
3. **Clean kitchen and lavatory faucet aerators** for steady water flow.
4. **Visibly inspect piping for leaks and corrosion** to identify potential leaks before they occur.
5. **Tag main line emergency shut-off valve** so you can easily identify the proper valve during a water crisis.
6. **Check washing machine hoses** for material flexibility and integrity, to identify the potential for hose rupture from deterioration.
7. **Flush water heater tank** to remove sediment build-up from your home water system to extend water heater life. This will also improve water heater recovery and performance. Clean water heater lint filter.
8. **Soap test visible gas lines** for life-threatening leaks.
9. **Inspect gas water heater exhaust flues** for leaks that might introduce deadly carbon monoxide to your home.
10. **Turning on/off** all stops to prevent seizing and costly repairs of replacing stops.
11. **One** preventive sewer clean per year (clean out required). Keep tree roots from becoming an issue of blocking your main line.
12. **One** Emergency Call per year at regular rate.
13. **10% off** service/repair work.

- \$143.50 per home. (1-2 bathroom homes included in pricing)  
Each additional bathroom \$29.99 each.
